AUGUSTYA

Gurgaon | +91-8700113952 | augustya13y@gmail.com | Portfolio | LinkedIn

SUMMARY

Designer and frontend developer who takes products from Figma to deployed code, with additional exposure to AI integration and data-driven design. Strong foundation in visual storytelling, interaction design, conversion-focused design, and building interfaces that are both functional and visually compelling.

SKILLS & CERTIFICATIONS

Design: Figma, Adobe Illustrator, Adobe Photoshop, UI/UX Design, Design Systems, Information Architecture
Web & Front-End: HTML, CSS, JavaScript, React.js, Responsive Design, Accessibility
Product & Growth: Product Strategy, Product Discovery, MVP Scoping, RICE Prioritisation, OKRs, PRDs, User Interviews, Usability Testing, Conversion Rate Optimisation (CRO), Funnel Analysis
Tools: Git, MySQL, Applied AI (Gemini API), MS Excel, Power BI, CRM, Data Analysis
Certifications: Front-end Developer Capstone, Fundamentals of Graphic Design, Hands-On Data Visualization with Microsoft Power BI

PROFESSIONAL EXPERIENCE

OptiPhoenix *Graphic Designer* Remote | May 2026 – Present

- Led the end-to-end redesign of the company website, restructuring information architecture and merging scattered content into one clear brand narrative.
- Designed and shipped conversion-focused landing pages and branded reports for client campaigns, building color and layout systems directly from each client's brand assets.
- Built a reusable design system (typography, color tokens, layout patterns) for the monthly newsletter and social calendar, so every issue and post ships consistently and faster.
- Produced marketing creatives (LinkedIn carousels, recognition posts, campaign visuals) combining coded (HTML/SVG) and traditional design workflows to move faster without sacrificing polish.

Indie Product Builder *Self-directed* Remote | Nov 2025 – May 2026

- Defined product vision, user personas, and OKRs for AdmitSync and ELI5; scoped and prioritised MVP features using the RICE framework; wrote PRDs and user stories with clear acceptance criteria before any development began.
- Conducted 10+ user interviews across AdmitSync and ELI5 to identify unmet needs; synthesised findings into journey maps, problem statements, and a prioritised backlog, deprioritising lower-impact features to protect launch timelines.
- Owned the full product lifecycle (discovery, wireframing in Figma, usability testing with ~15 users, and post-launch iteration), reducing navigation friction by ~25% across products.

Learning Routes *Management Trainee* Gurgaon | Jun 2025 – Aug 2025

- Tracked the end-to-end sales pipeline via CRM and Excel; identified funnel drop-off patterns and presented data-driven findings to senior managers, leading to process improvements adopted by the team.
- Prepared weekly reports on client interactions and lead conversions, directly informing decision-making for senior managers.

PROJECTS

AdmitSync – Deadline Tracker for Indian Entrance Exams | Live

- Defined the product for Indian competitive exam aspirants, aggregating scattered JEE, NEET, CAT, and CLAT deadlines into one personalized timeline.
- Scoped the MVP into P0 and P1 features (deadline feed, personalized dashboard, deadline alerts, search) with a clear post-launch roadmap.
- Designed an AI-assisted data pipeline (Gemini API) that flags changed exam dates for admin review, with “last verified” timestamps to build user trust.

LearnSign – AI Sign Language App

- Designed a playful, gamified interface for young learners with visual reward elements, accessible color usage, and intuitive iconography.
- Iterated the interface based on usability trials, improving clarity and reducing drop-off through better interaction cues.

SHUSH – Health Content Visual Identity | Live

- Designed a calm, approachable visual identity for sensitive health content: soft color palette, clear hierarchy, and intuitive navigation that reduced friction in a high-empathy context.
- Refined UI spacing and aesthetics through mentor feedback loops, shipping a cleaner, more readable interface.

EDUCATION

Arya College of Engineering and I.T, Jaipur, B.Tech, Computer Science, CGPA: 8.5/10 2021 – 2025
