SUMMARY

CS graduate with hands-on experience defining product strategy, conducting user research, and shipping AI-powered products from zero to MVP. Combines technical fluency (React, Python, APIs) with structured product thinking — PRD writing, roadmap prioritization, and go-to-market planning. Seeking Associate Product Manager/ Product Manager roles at product-led companies.

SKILLS

Product & Research: Product Strategy, PRD Writing, Roadmap Prioritization, OKR Definition, Go-to-Market Planning, User Research, Usability Testing, Competitive Analysis

Execution: Agile / Scrum, RICE, MoSCoW, Feature Prioritization, Stakeholder Management, Cross-functional Collaboration

Analytics: SQL, Python, Funnel Analysis, A/B Testing (conceptual), Data-driven Decision Making, Power BI

Tools: Figma, Notion, Jira, Excel, React.js, Node.js, REST APIs, Git

EXPERIENCE

Indie Product Builder — Product Manager & Developer

Remote | Nov 2025 – Present

- Defined product vision, user personas, and OKRs for products including AdmitSync, ELI5, and FitAI; scoped and prioritised MVP features using **RICE framework**, wrote **PRDs and user stories** with clear acceptance criteria before any development began.
- Conducted 10+ user interviews across AdmitSync and ELI5 to identify unmet needs; synthesised findings into **journey maps**, problem statements, and a **prioritised backlog**; deprioritising lower-impact features to protect launch timelines.
- Owned **full product lifecycle** — discovery, wireframing in Figma, usability testing with ~15 users, and post-launch iteration reducing navigation friction by ~25% across products.

Learning Routes — Management Trainee

Gurgaon | Jun 2025 – Aug 2025

- Tracked the end-to-end sales pipeline via CRM and Excel; identified funnel drop-off patterns and presented **data-driven** findings to senior managers, leading to process improvements adopted by the team.
- Prepared weekly Excel and PowerPoint reports on lead conversions; conducted outbound client calls and attended strategy meetings, gaining direct exposure to customer pain points and retention challenges.

Celebal Technologies — Data Science Intern

Jaipur | May 2024 – Aug 2024

- Collaborated with stakeholders to translate business objectives into model requirements and defined evaluation metrics — structured **requirement gathering** and cross-functional communication applied to an ML context.
- Built and iterated on a CNN image classification model (92% accuracy, 10,000+ images) through a **test-and-learn** cycle; communicated findings to non-technical stakeholders via visualisations and summary reports.

PRODUCT PORTFOLIO

AdmitSync — College Application Tracker · Product Lead & Developer

- Validated problem through 8+ peer conversations; defined **north star metric**, wrote PRD with 3 user personas, and prioritised features using **MoSCoW**; shipped MVP in 3 weeks. Post-launch usability testing revealed navigation gaps; redesigned **information architecture**, reducing task completion time by ~25%.

ELI5 — Explain Like I'm 5 · Product Lead & Developer

- Identified gap in accessible plain-language explanations; defined **north star metric** around comprehension success rate, wrote PRD with 3 personas, and shipped MVP in 4 weeks using AI-generated simplified explanations.
- Ran usability trials with ~10 users post-launch; iterated on prompt design and UI copy, improving task success rate and reducing confusion on core explanation flows.

FitAI — AI Fitness Coach · Product Lead & Developer

- Defined **go-to-market** positioning around personalisation gap; scoped lean MVP with goal-based plans, adaptive routines, and progress tracking. Led **sprint prioritisation** using a living backlog, making weekly scope decisions based on user value vs. build complexity.

LearnSign — Sign Language Learning Tool · Product Lead & Developer

- Applied **JTBD framework** and gamification principles (streaks, rewards, instant feedback loops) to drive engagement for young learners; validated design through usability trials with ~15 peers and faculty.

EDUCATION

Arya College of Engineering and I.T, Jaipur

B.Tech — Computer Science | CGPA: 8.5 / 10 | 2021–2025

Indraprastha Convent Senior Secondary School, Delhi

CBSE Class XII — 91% | 2019–2021

Delhi Public School, Maruti Kunj, Gurgaon

CBSE Class X — 85% | 2007–2019
